SUBJECT INDEX

Bradykinin
Study of the charge-remote fragmentation of bradykinin using ^{252}Cf-plasma desorption mass spectrometry 55

Coulombic effects
Coulombic effects in the dissociation of large highly charged ions 103

β-Crystallins
Mass spectrometric analysis of lens β-crystallins 229

Deoxyribonucleic acids
Chemical modification of deoxyribonucleic acids: quantitation of 3-methylthymidine and O^4-methylthymidine by tandem mass spectrometry 381

Diagnostic markers
The analysis of diagnostic markers of genetic disorders in human blood and urine using tandem mass spectrometry with liquid secondary ion mass spectrometry 211

2,5-Dihydroxybenzoic acid
2,5-Dihydroxybenzoic acid: a new matrix for laser desorption–ionization mass spectrometry 89

β-Endorphin
Mass spectrometric measurement of β-endorphin and methionine enkephalin in human pituitaries. Tumors and post-mortem controls 247

Endothermic ion/molecule reactions
Endothermic ion/molecule reactions. Part VI. Reaction-induced dissociation of peptides containing basic residues using dimethyl- and trimethylamine 27

Ethyl-triphenylphosphonium derivative
Characterization of the ethyl-triphenyl-phosphonium derivative of model peptides by fast atom bombardment collisionally-activated dissociation tandem mass spectrometry using B/E linked scans 191

FAB overlapping
FAB overlapping: a strategy for sequencing homologous proteins 287

Genetic disorders
The analysis of diagnostic markers of genetic disorders in human blood and urine using tandem mass spectrometry with liquid secondary ion mass spectrometry 211

"Internal" fragment ions
Sequential mass spectrometry applied to the study of the formation of "internal" fragment ions of protonated peptides 173

Lipid A preparations
^{252}Cf-plasma desorption mass spectrometry applied to the analysis of endotoxin Lipid A preparations 273

Lobster digestive cysteine proteinases
Characterization of a mixture of lobster digestive cysteine proteinases by ionspray mass spectrometry and tryptic mapping with LC–MS and LC–MS–MS 317

Methionine enkephalin
Mass spectrometric measurement of β-endorphin and methionine enkephalin in human pituitaries. Tumors and post-mortem controls 247

3-Methylthymidine
Chemical modification of deoxyribonucleic acids: quantitation of 3-methylthymidine and O^4-methylthymidine by tandem mass spectrometry 381

O^4-Methylthymidine
Chemical modification of deoxyribonucleic acids: quantitation of 3-methylthymidine and O^4-methylthymidine by tandem mass spectrometry 381

Molecular ion formation
Radial velocities of ejected ions: implications for the mechanisms of molecular

ion formation in plasma desorption mass spectrometry of biomolecules 41

Nucleic acid constituents
Matrix-assisted laser desorption Fourier transform mass spectrometry for the structural examination of modified nucleic acid constituents 365

Parvalbumins
Mass spectrometry of proteins: studies of parvalbumins by plasma desorption, laser desorption and electrospray mass spectrometry 151

Phospholipids
Phospholipids in middle ear effusion and serum analysed by liquid ionization mass spectrometry 263

Porpoise relaxin
Enzymatic digestion on the sample foil as a method for sequence determination by plasma desorption mass spectrometry: the primary structure of porpoise relaxin 77

Sequencing
Sequencing an "unknown" peptide by time-of-flight secondary ion mass spectrometry 301

Structural analysis
Structural analysis of proteins by capillary HPLC electrospray tandem mass spectrometry 131

Trace metal absorption
The study of trace metal absorption using stable isotopes and mass spectrometry 355

Variable dispersion array detector
A variable dispersion array detector for a tandem mass spectrometer 1
